

## Digital intensity of Industrial modelling & geospatial software skills

The dot plot displays the digital intensity of various countries. The x-axis is labeled 'Less Digitally Intensive' on the left and 'More Digitally Intensive' on the right. The plot shows a dense cluster of countries in the 'More Digitally Intensive' region, with a few outliers in the 'Less Digitally Intensive' region. The countries are represented by colored dots: blue for high digital intensity, yellow for medium, and orange for low. The plot shows a dense cluster of countries in the 'More Digitally Intensive' region, with a few outliers in the 'Less Digitally Intensive' region.
